主席報告書 CHAIRMAN'S STATEMENT

On behalf of the Board of the Company, I am pleased to present to the shareholders of the Company the annual results of the Group for the year ended 31 December 2012.

本人謹代表本公司董事會,欣然向本公司股東呈列本集團截至二零一二年十二月三十一日止年度的全年業績。

RESULTS

Given the low demand from Europe and the US and weak growth or even an expectation on hard landing of the PRC economy, every sector was exposed to immense pressure to adjust their strategy in 2012. The rising domestic production costs in the PRC have also presented challenges to the industry and become a trend. Due to the exercise of controls over both the price of cotton and import volume by the PRC government, cotton prices in the PRC hovered at high levels rather than following the trend of fluctuations and falls similar to international prices under weak global demand. Against this backdrop, the PRC cotton textile industry has encountered adversity to a degree exceeding that of the 2008 financial turmoil.

However, the Group has implemented scale expansion and product differentiation strategies at the same time. With the existing production base in Vietnam, the Group commenced the construction of a new plant in northern Vietnam in 2012. The Group's domestic and overseas production bases have managed to leverage their competitive advantages and secure greater market share in the PRC, in a business environment where our industry peers in the PRC faced harsh challenges and some of them were placed in jeopardy or even suspended production. Our yarn sales in 2012 reached a new high of about 243,000 tonnes.

As for positioning and marketing of our products, in addition to strengthening the market expansion of corespun yarns, the Group's traditional competitive product, we also actively stepped up efforts in expanding the market of denim yarns and producing knitted yarns. A wide range of differentiated fibres was also used. We adhered to a business strategy focused on expansion of our scale of operations and production of differentiated products. Besides, in relation to the purchase of the principal raw materials, especially cotton, we stood out from our industry peers in terms of operating results by taking bold steps and measures to leverage on the difference in prices of domestic and overseas cotton in 2012 and rapidly increasing the consumption of overseas cotton.

During the year, the Group recorded a total revenue of RMB7,341.5 million, representing an increase of 6.8% when compared to that of 2011. Profit for the year grew substantially by seven times to RMB486.3 million. Earnings per share in 2012 amounted to RMB0.55, representing an increase of 685.7% when compared to that of 2011.

業績

面對歐美市場需求不振及中國經濟增長乏力, 甚至預期會呈現硬著陸的局面,導致所有行 業在二零一二年面對巨大的調整壓力;中國 國內生產成本不斷上漲對行業的挑戰也早已 是大勢所趨;中國政府對棉花的價格以及進 是大勢所趨;中國政府對棉花的價格以及進 上數量進行管制,使到中國境內的棉花價格 並沒有因全球需求減弱而跟隨國際棉價反復 下跌,反而在高位徘徊。綜合上述原因,中 國棉紡織行業所面對的困境,遠比二零零八 年金融風暴時更甚。

然而,本集團實施規模化及產品差異化同步並進的策略。本集團以越南的現有生產基地為基礎,二零一二年於越南北部開展新廠房的建設。當國內同業面對嚴峻經營環境,部分廠商陷於半停頓,甚至暫時停產的狀態時,本集團的海內外生產基地却全面能發揮競爭優勢,促使我們在中國奪取更大的市場份額,於二零一二年的紗線銷售量約達24.3萬噸,創造歷史紀錄。

在市場產品定位及營銷方面,除了加強對傳統優勢產品包芯紗的市場開拓,我們更積極拓展牛仔紗市場以及嘗試生產針織用紗,並配合使用各種特色的差別化纖維,貫徹落實規模化擴充及生產差異化產品。另外,在主要原材料,特別是棉花採購方面,我們把握住二零一二年中國及海外棉花的價格差異,採取果斷的應變措施,迅速提升海外棉花的使用量,從而取得比同業較佳的經營成果。

年內,本集團錄得總收入人民幣73.415億元,較二零一一年同期上升6.8%。年內溢利大幅上漲七倍至人民幣4.863億元。二零一二年的每股盈利為人民幣0.55元,較二零一一年增加685.7%。

主席報告書 CHAIRMAN'S STATEMENT

OUTLOOK

Stagnant market conditions can sometimes present an outstanding development opportunity. In light of the competitive landscape of the PRC textile market, enterprises with strong core competitiveness are wellpositioned to secure greater credibility and carve out a larger market coverage. This is the principle of "survival of enterprises with strong advantages and elimination of enterprises with poor performances" as referred to in our prior annual reports. The year 2012 further validated this principle. Currently, the trend towards a consumptiondriven economy in the PRC is clear, and transformation and upgrade will be a hallmark of the next round of development for the industry. This does not only lay a solid foundation for the Group to implement a long term product differentiation strategy, but also offers favourable development opportunities. Economic slowdown would definitely affect the course of market globalisation, while trade protectionism brings both challenges and opportunities. Cooperations among local industry players and quick responses to global and local markets are becoming prevalent trends and create opportunities for the globalisation of the textile industry. In view of the prolonged price gap of cotton between China and overseas due to the differentiation in policies, enterprises with overseas production bases will have greater room for growth and a strong early-mover advantage. As a leading player in the globalisation of the textile industry, the Group will further expand the scale of its overseas production bases, in order to capture the prevailing opportunity and uphold a development strategy with a dual focus on the global expansion of its scale of operations and an organic industrial upgrade through implementation of the differentiation and other strategies.

Within the US-supported Trans-Pacific Strategic Economic Partnership Agreement, the framework agreement for the world's largest free trade zone in the Pan-Pacific region, Vietnam occupies a vital strategic position and enjoys remarkable competitive advantage. Not only is it one of the potential members of Trans-Pacific Partnership, Vietnam is also one of the key overseas production bases of the Group. The construction of our new plant in northern Vietnam has progressed smoothly since commencement in July 2012. The equipment for the first phase of approximately 170,000 spindles and 30 sets of open-end spinning machines are expected to be installed and put into trial production in the first quarter of 2013, with full production anticipated at the end of the second quarter. This new plant covers an area of about 36 hectares, and can be built into a production base of up to 400,000 spindles. The total investment for the project is about RMB1.1 billion. Following the commissioning of the first phase of production base, we will evaluate the construction of the remaining 230,000 spindles by taking into account of the then cash flows. The plant is currently planned to be completed and put into operation in 2014.

展望

市場欠佳時可以是最好的發展時機。在競爭 激烈的中國紡織市場中,對於具有核心競爭 力的企業會有更好的可信度及更大的市場空 間,這是我們在過往的年報中,經常提到的 「優勝劣汰乃自然法則」, 這一法則, 在二零 一二年度又再一次完全體現。目前,中國市 場的消費拉動導向十分明顯,轉型升級將是 下一輪發展的產業機會,這對本集團長期實 施產品差異化策略創造了良好基礎之外,更 是個有利的發展時機;全球市場低迷必將影 響市場全球化,貿易保護主義是挑戰也是機 遇,產業鏈本地協作、全球及本地市場要求 的快速反應將會是主要趨勢,這為紡織產業 的全球化布局提供機會;另外,中國市場及 海外棉花的價差由於政策差異將長期存在, 擁有海外生產基地的企業將具備更多空間, 也必然穩奪先機,本集團作為紡織行業全球 化的領先企業之一,將進一步擴大海外生產 基地規模,抓住機遇,繼續實施在全球範圍 內的規模化擴張及差異化等內涵式產業升級 同步推進的發展戰略。

主席報告書 CHAIRMAN'S STATEMENT

While consolidating our production strengths in Vietnam, we would not rule out the possibility of the construction or acquisition of production bases in other countries with promising potential, so that our production network would gradually become globalised. This would enable us to cope with the huge domestic demand from the PRC market and cater for the demand for our varns from overseas customers. By further extending into overseas markets and customers, we should significantly enhance our market awareness and response time to capture the demand for various products, and compete more efficiently in the context of rising trade barriers that may hinder market development. In particular, to explore the market in South America, we plan to invest a total of RMB400 million to build a synthetic fibre yarn production base in Uruguay with construction to be completed in 2014. The investment project in Uruguay would enable us to tap the markets in South America and produce different types of yarns, and also effectively mitigate the impact of cotton market fluctuations on our operation.

In 2012, the Group was awarded "one of the top 20 competitive cotton textile enterprises" by China National Textile and Apparel Council for the ninth consecutive year. Competition in the textile industry is extremely severe as this industry has a long history of development. Yet, this traditional manufacturing industry is also characterised by its chic and innovation components along with huge domestic and global demand. We believe that we can deliver outstanding results and achieve significant growth if we can grasp the opportunities in the market through our passionate creativity and breadth of innovation as well as spirit of professionalism.

在二零一二年,本集團獲「中國紡織工業協會」 嘉許為「二十大最具競爭力棉紡織廠之一」一 這已是連續九年獲得的榮譽。紡織行業是傳 統製造業,行業內部競爭當然是非常激烈的, 但我們認為紡織服裝行業是時尚及創新兼備 的領域,且擁有龐大的中國及全球市場需求, 只要我們繼續發揮豐富的想像力、對行業充 滿激情、發揚專業與創新的精神,找准並把 握市場機遇,企業當然能獲取豐厚的回報及 長足的發展。

We will continue to promote unified corporate values and guidelines and persevere with our operating strategy which focuses on "professionalism, perfectionism and globalisation". We expect that the Group will maintain a steady growth in the years to come with a target of earning an annual revenue of more than RMB10 billion in the near future.

本集團繼續倡導統一的價值觀及行動方案, 秉持「專業化、精益化、國際化」的營運策略。 我們預期本集團在未來幾年將維持穩定增長, 於不久將來達成年收入達人民幣百億元的目標。

ACKNOWLEDGEMENT

On behalf of the Board, I would like to express my sincere thanks to all the shareholders and customers for their continuous support. Also, I would like to take this opportunity to thank all our dedicated staff members for their valuable contributions during the year.

管理層討論及分析

MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW

We are pleased to report to the shareholders the annual results of the Group for the year ended 31 December 2012. For the PRC textile industry, the past year presented a difficult operating environment, which stemmed from the weakening of the overall demand on one hand, and from high prices of domestic raw materials on the other hand. Some industry players were in a perilous state or even suspended production. The Group managed to stay ahead of the production cycle within and outside the PRC by riding on the advantages of its overseas production bases and swiftly adjusting the procurement strategy of raw materials, thus achieving a turnover rebound and a significant increase in earnings when compared to that of 2011. When compared to 2011, the Group recorded a turnover growth of 6.8% to RMB7,341.5 million. Profit for the year significantly increased by seven times to RMB486.3 million. Earnings per share rose by seven times from RMB0.07 during the corresponding period in 2011 to RMB0.55.

INDUSTRY REVIEW

In 2012, the PRC's textile industry faced a number of challenges in three major areas, namely the sluggish external demand, the significant disparity in cotton prices within and outside the PRC as well as the rise in production costs in the PRC.

The demand from the international market was slack. According to statistics, the total exports of textiles and clothing to the US and the European Union from January to November recorded a decrease of 0.9% and 5% respectively when compared to the corresponding period of 2011, resulting in a shortage of orders placed with export enterprises in the PRC. In addition, as cotton prices in the domestic market exceeded international prices by about 45% at the end of 2012 due to the impact of national policy, the competitiveness of the cotton spinning industry chain was materially affected. The rise in costs has imposed considerable pressure on enterprises. The survey of China Cotton Textile Industry Association shows that direct labour costs jumped by about 10% in 2012 on an individual basis.

綜覽

我們欣然向股東報告本集團截至二零一二年十二月三十一日止年度全年業績。在過去一年,中國紡織行業的經營環境舉步維艱,一方面整體需求疲弱,另一方面,國內原料產 格高昂,導團憑著海外生產基地的優勢發展, 強調整原料採購策略,穩住國內外生產的優勢 速調整原料採購策略,穩住國內外生產的優勢 致使營業額不跌反升,盈利更比二零一一年同期錄得顯著增長。相比二零一一年同期,本集團錄得營業額增長6.8%至人民幣73.415億元。年內溢利大幅增加7倍至人民幣4.863億元。每股盈利亦由二零一一年同期人民幣0.07元躍升7倍至人民幣0.55元。

行業回顧

外需不振、國內外棉花價格差異巨大,以及中國的生產成本上漲,是中國紡織工業在二零一二年所面對的三大考驗。

國際市場需求低迷,根據相關資料,一月至十一月,對美國和歐盟紡織品服裝出口總額相比二零一一年同期分別下降0.9%和5%, 造成中國出口企業訂單不足。另外,受國內管理政策影響,二零一二年底國內棉價比國際市場高出約45%,嚴重影響了棉紡產業鏈的競爭力。成本的增加也給企業帶來了下,的壓力。中國棉紡織行業協會調查顯示,在二零一二年,單是勞工的直接成本更增加了10%左右。

INDUSTRY REVIEW (Continued)

Given this challenging scenario, there was a setback in the overall performance of the PRC textile industry in 2012 when compared to the corresponding period last year. According to the data of the National Bureau of Statistics, the revenue and gross profit from principal business operations of above-scale enterprises in the PRC cotton textile industry from January to November was up by only 13.5% and only 7.5% respectively, when compared to the corresponding period of 2011. The rate of growth was remarkably slower when compared with that of 2011. The reduction in efficiency was also reflected in losses of enterprises. From January to November 2012, losses of above-scale enterprises accounted for a rate of 13%, which was considerably more severe than the situation in 2011.

Despite a continuous slowdown in the growth of the sales market, the performance in the second guarter of 2012 was better than that in the first quarter, while that in the third quarter was even more satisfactory. The performance in November 2012 has followed this growth trend. Looking ahead to 2013, in view of the ongoing European debt crisis and rising production costs, the market conditions would not pick up in the immediate future. However, the PRC's policy focus on accelerated urbanisation should effectively give fresh impetus to domestic demand. Moreover, we believe that the migration of the rural population, accounting for 57% of the PRC's total population of 1.3 billion, to urban areas can alleviate the high labour costs of the cotton textile industry. All these favourable factors should act to improve the operating environment of the textile enterprises which mainly focus on the domestic market.

BUSINESS REVIEW

For the year ended 31 December 2012, the turnover of the Group was RMB7,341.5 million, representing an increase of 6.8% over the corresponding period last year, which was mainly attributable to the growth in the sales volume of yarns. The turnover contributions are mainly derived from sales of yarns, grey fabrics and garment fabrics.

行業回顧(續)

面對種種挑戰,中國紡織行業在二零一二年的整體業績表現較去年同期遜色。根據國家統計局資料顯示,一至十一月,中國棉紡織規模以上企業主營業務收入及利潤總額相比二零一一年同期增長13.5%及7.5%,與二零一一年同期相比,增幅明顯緩慢。效益的下滑也同時體現在企業的虧損上,二零一二年一至十一月,規模以上企業虧損面達13%,較二零一一年相比則更加嚴峻。

儘管二零一二全年銷售市場的走勢持續緩慢,但整體而言,二零一二年第二季度的表現現於第一季度,第三季度又較一、二季度及為生。 直到二零一二年十一月仍處於增長的決勝, 展望二零一三年,歐債危機懸而未暖。 成本持續高企,市況不會瞬間回暖, 中國的政策焦點將加速城鎮化發展,,農村口 中國的政策,其中有一部分將轉為城中, 相信能有助舒緩相紡織行業勞工成本內 問題。這些利好因素將有力改善 為主的紡織企業的經營氛圍。

業務回顧

截至二零一二年十二月三十一日止年度,本集團的營業額為人民幣73.415億元,比去年同期上升6.8%,主要由紗線銷量增長帶動。營業額貢獻主要來自紗線、坯布及面料的銷售。

BUSINESS REVIEW (Continued)

Yarn continued to be the major product of the Group with a turnover of RMB6,146.9 million, accounting for 83.7% of the Group's total turnover for the year ended 31 December 2012. In spite of the weak demand from downstream textile manufacturers in the PRC, the total demand remained huge. Against the background of the incapability of some manufacturers to continue business operation in light of low product prices and high production costs in the PRC, the Group successfully secured a relatively large market share from its competitors by capitalising on the advantages of its production base in Vietnam and the stable and full range of product offerings. When compared with the corresponding period of 2011, sales volume increased by 28% to about 243,000 tonnes, reaching a record high volume. Affected by the fall in cotton prices, the average unit selling price of yarn decreased by 17.0% from RMB30,500 per tonne during 2011 to RMB25,308 per tonne during 2012. Turnover of grey fabric was RMB1,027.9 million, accounting for 14.0% of the Group's total turnover for the year ended 31 December 2012.

業務回顧(續)

紗線繼續成為本集團的重點產品,營業額達 到人民幣61.469億元,佔集團截至二零一二 年十二月三十一日止年度之總營業額的 83.7%。雖然來自中國下游紡織廠的需求不 振,但總量需求依然巨大,當產品價格低迷, 國內生產成本居高不下,部分廠家沒法持續 經營的情況下,本集團憑著越南生產基地的 優勢及穩定的全系列產品供應,從競爭對手 中成功奪取不少市場份額,與二零一一年同 期比較,銷量增加28%至約24.3萬噸,打破 歷年銷量紀錄。受到棉花價格下跌的影響, 紗線的平均銷售單價從二零一一年同期每噸 人民幣30,500元下降17.0%至二零一二年每 噸人民幣25,308元。坯布的營業額為人民幣 10.279 億元, 佔集團截至二零一二年十二月 三十一日止年度之總營業額的14.0%。

BUSINESS REVIEW (Continued)

The overall gross profit margin of the Group for the year ended 31 December 2012 increased from 8.1% for the corresponding period last year to 15.3%. Cotton is the major raw materials of the Group. In particular, cotton prices in the PRC exerted the greatest impact on the selling price of the Group's products. Though there was a sharp fall in the selling prices of the Group along with a drop in cotton prices in 2012, benefiting from the consumption of cheaper overseas cotton at overseas production base plus the prompt adjustment in switching to the use of overseas cotton by domestic production bases, production costs were effectively reduced, resulting in a rebound of gross profit margin.

During the year, about 1 million spindles of the Group were put into full production. The output of cotton and denim yarn tonnage of the Vietnam plant already exceeded 58% of the total cotton and denim yarns output of the Group. This underscored the success of the Group's strategic initiative to establish overseas plants. This move enables us to leverage the low overseas production cost advantages and successfully improves the overall profit on one hand, while effectively lowering the risk exposures associated with pure local production in the PRC on the other hand. In 2012, cotton yarns, denim yarns and synthetic fibre yarns accounted for 49.4%, 31.2% and 19.4% of the total sales volume of yarns of the Group respectively.

The Group has also further strengthened the strategic cooperation with INVISTA North America S.à.r.I ("Invista") and Lenzing Fibers (Shanghai) Co., Ltd. ("Lenzing"). At the same time, the Group has continued to produce different high-end non-spandex core-spun varns, high-end denim varns and high-end knitted varns using the cellulose-based Tencel® fibre, Modal® fibre and viscose fibre supplied by Lenzing. In addition, we consistently apply environmental-friendly polyester to produce blended yarns with other fibres. The Group has further reinforced cooperative relationship with Toray of Japan. Our research and development centre in Changzhou has been developing products and improving product quality in reaction to market demand, in order to maintain a leading position in the industry and to meet the demand of quality customers for different high-end products.

業務回顧(續)

集團於截至二零一二年十二月三十一日止年度整體毛利率由二零一一年同期的8.1%增加至15.3%。棉花是本集團的主要原材料,特別是中國棉花價格對本集團產品售價別營報。雖然二零一二年本集團產品售價隨著棉花價格下跌而大幅下滑,但受惠於海外生產基地可以採用更廉宜的海外棉花,加上國內生產基地也迅速地作出調整,儘量改用海外棉花,此舉有效降低生產成本,最終令毛利率不跌反升。

年內,集團共約100萬紗錠全面投產,越南廠房產出的棉及牛仔紗線噸數已超過整個集團的棉及牛仔紗線產出的58%,完全突顯集團在海外設廠的戰略部署的成功。此項部署一方面發揮了海外的低生產成本優勢,成功提升整體利潤,同時有效降低只在中國本地生產的風險。在二零一二年,棉紗線、牛仔紗線及化纖類紗線分別佔本集團總紗線銷售量的49.4%、31.2%及19.4%。

本集團繼續與INVISTA North America S.à.r.I (「Invista」)及蘭精纖維(上海)有限公司(「蘭精」)緊密合作,同時也繼續著力生產由蘭精供應的 cellulose-based Tencel®、Modal®及 粘膠製造高檔非氨綸包芯紗、高檔牛仔紗及高檔針織用紗。此外,本集團貫徹採用具有環保概念的滌綸與其他纖維的混紡紗線。本集團進一步強化與日本東麗公司的合作關係。本集團位於常州的研發中心也不斷因應市場需求而開發及改良產品質素,鋭意在業界保持領先地位,並主攻在不同產品領域上最優質的客戶群。

PROSPECT

Prices of cotton and other agricultural products will continue to be subject to global economic conditions and the volatility of the financial market. Currently, overseas cotton prices hover at low levels, in contrast to the PRC where domestic cotton prices are maintained at high levels, which continuously exerts tremendous pressure on the operation of domestic textile manufacturers. Though the Group has successfully established a foothold in Vietnam and the current operating environment is more conducive to the Group's vvina for a larger market share in the PRC, we believe that this unusually favourable operating environment is of limited duration. Accordingly, the Group fully intends to capture the opportunities for expansion, dedicate itself to enhance the production process and provide differentiated high quality products, so that we remain capable of maintaining a leading position in the industry through our competitive strength when a normal operating environment resumes.

The construction of the new plant in northern Vietnam has progressed smoothly since commencement in July 2012. The equipment for the first phase of approximately 170,000 spindles and 30 sets of open-end spinning machines are expected to be installed and undergone trial production in the first quarter of 2013, and is anticipated to launch full production at the end of the second quarter of 2013. As our products are in robust demand in the market, the productivity of our production bases in China should also be enhanced and the equipment would be upgraded accordingly, in order for us to cope with the market demand. We expect that about 500,000 spindles and 30 sets of open-end yarn spinning machines will be installed at the Group's production bases in the PRC and Vietnam in 2013 and the related capital expenditures will be approximately RMB980 million.

As for the purchases of raw materials, as cotton prices in the international market are far lower than that in the PRC, the Group has stepped up efforts to purchase cotton from overseas countries. The existing cotton inventory and purchase orders with determined pricing are sufficient to meet our need in the coming five months.

Looking ahead, the Group's management aims at improving our profitability by optimising our existing product mix, developing new products that cater for the trends and demand of the market and fully leveraging the cost advantages of our plants in Vietnam. Furthermore, our goal is to sustain a high growth rate in profit and turnover through expansion of production capacity, thereby reinforcing our competitiveness and leading position within the industry.

前景

我們在越南北部的新廠房建設,在二零一二年七月啟動以來進展順利,第一期約17萬紗錠及30台氣流紡紗機預計在二零一三年第一季度陸續安裝設備並同時開始試生產,可望於第二季度末全面投產。由於市場對我們在國內的生產基地內會和應增加產能及更新設備以應付市場需求內的生產基地將安裝共約50萬紗綻及30台氣流紡紗機,而相關資本開支約為人民幣九億八千萬元。

在原材料採購方面,有鑒於目前國際棉花市場的價格遠低於中國的棉花價格,本集團已加大採購海外棉花的力度,目前的棉花庫存加上已定價的採購訂單,將足夠應付未來約五個月的用量。

展望未來,管理層將透過改良現有產品結構、開發迎合市場需要的新產品及充分發揮越南生產基地的成本優勢,著力提升獲利能力。 另外,本集團亦期望通過擴充產能,使到利潤與營業額維持高增長步伐,令本集團在業界保持最具競爭力及領先的地位。

The preparation of financial statements in conformity with HKFRS requires the use of certain critical accounting estimates. 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

2.1 Basis of preparation (Continued)

Changes in accounting policy and disclosures

(a) New and amended standard adopted by the Group

The HKICPA has amended HKAS 12. 'Income taxes', to introduce an exception to the principle for the measurement of deferred tax assets or liabilities arising on an investment property measured at fair value. HKAS 12 requires an entity to measure the deferred tax relating to an asset depending on whether the entity expects to recover the carrying amount of the asset through use or sale. The amendment introduces a rebuttable presumption that an investment property measured at fair value is recovered entirely by sale. The amendment is applicable retrospectively to annual periods beginning on or after 1 January 2012. The amandent is not relevant to the Group, as the Group has no investment property now.

Other than as disclosed below, there are no HKFRSs or HK(IFRIC) interpretations that are effective for the first time for the financial year beginning on 1 January 2012 that would be expected to have a material impact on the group.

HKFRS 9. 'Financial instruments'. addresses the classification. measurement and recognition of financial assets and financial liabilities, effective for accounting period beginning on or after 1 January 2015. HKFRS 9 was issued in November 2009 and October 2010. It replaces the parts of HKAS 39 that relate to the classification and measurement of financial instruments. HKFRS 9 requires financial assets to be classified into two measurement categories: those measured as at fair value and those measured at amortised cost. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, the standard retains most of the HKAS 39 requirements. The main change is that, in cases where the fair value option is taken for financial liabilities. the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income ("OCI") rather than the income statement. unless this creates an accounting mismatch.

Changes in accounting policy and disclosures (Continued)

(b) New and amended standards have been issued but are not effective for the financial year beginning 1 January 2012 and have not been early adopted (Continued)

HKFRS 10. 'Consolidated financial statements', effective for accounting period beginning on or after 1 January 2013. The objective of HKFRS 10 is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entity (an entity that controls one or more other entities) to present consolidated financial statements. Defines the principle of control, and establishes controls as the basis for consolidation. Set out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee. It also sets out the accounting requirements for the preparation of consolidated financial statements.

HKFRS 11, 'Joint arrangements' is a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangements rather than its legal form, effective for accounting period beginning on or after 1 January 2013. There are two types of joint arrangements: joint operations and joint ventures. Joint operations arise where a joint operator has rights to the assets and obligations relating to the arrangement and hence accounts for its interest in assets, liabilities, revenue and expenses. Joint ventures arise where the joint operator has rights to the net assets of the arrangement and hence equity accounts for its interest. Proportional consolidation of joint ventures is no longer allowed.

HKFRS 12, 'Disclosures of interests in other entities', effective for accounting period beginning on or after 1 January 2013, includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles.

HKFRS 13, 'Fair value measurement', effective for accounting period beginning on or after 1 January 2013. aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across HKFRSs. The requirements, which are largely aligned between HKFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within HKFRSs.

Amendments to HKAS 1, 'Presentation of Financial statements' regarding other comprehensive income, effective for accounting period beginning on or after 1 January 2013. The main change resulting from these amendments is a requirement for entities to group items presented in OCI on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments). The amendments do not address which items are presented in OCI.

The interpretation sets out the accounting for overburden waste removal (stripping) costs that are incurred in surface mining activity during the production phase of a mine. The interpretation may require mining entities reporting under HKFRS to write off existing stripping assets to opening retained earnings if the assets cannot be attributed to an identifiable components of an ore body.

2.2.1 Consolidation

(a) Subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

De-facto control may arise from circumstances where it does not have more than 50% of the voting power but is able to govern the financial and operating policies by virtue of de-facto control.

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from intercompany transactions that are recognized in assets are also eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

(b) Business Combination

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any noncontrolling interest in the acquiree on an acquisition-byacquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

Acquisition-related costs are expensed as incurred.

(c) Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(d) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

2.2 Subsidiaries (Continued)

2.2.2 Separate financial statements

Investments in subsidiaries are accounted for at cost less impairment. Cost also includes direct attributable costs of investment. The results of subsidiaries are accounted for by the company on the basis of dividend and receivable.

Impairment testing of the investments in subsidiaries is required upon receiving dividends from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

2.3 Associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognized at cost, and the carry amount is increased or decreased to recognize the investor's share of the profit or loss of the invested after the date of acquisition. The Group's investment in associates includes goodwill identified on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

2.3 Associates (Continued)

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/(loss) of an associate' in the consolidated income statement.

Profits and losses resulting from upstream and downstream transactions between the Group and its associate are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Dilution gains and losses arising in investments in associates are recognised in the consolidated income statement.

2.4 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Committee of Executive Directors of the Company that makes strategic decisions.

2.5 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in RMB, which is the Company's functional and the Group's presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the consolidated income statement within 'finance costs – net'. All other foreign exchange gains and losses are presented in the consolidated income statement within 'other losses – net'.

(c) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (ii) income and expenses for each consolidated income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- (iii) all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations, and of borrowings and other currency instruments designated as hedges of such investments, are taken to other comprehensive income. When a foreign operation is partially disposed of or sold, exchange differences that were recorded in equity are recognised in the consolidated income statement as part of the gain or loss on sale.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

2.6 Property, plant and equipment

Buildings comprise mainly factories and offices. Buildings are shown at fair value, based on periodic, but at least triennial, valuations by external independent valuers, less subsequent depreciation for buildings. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the consolidated income statement during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of buildings are recognised in other comprehensive income. Decreases that offset previous increases of the same asset are charged to other comprehensive income; all other decreases are charged to the consolidated income statement. Each year the difference between depreciation based on the revalued carrying amount of the asset charged to the consolidated income statement and depreciation based on the asset's original cost is transferred from 'revaluation reserve' to 'retained earnings'.

2.6 Property, plant and equipment (Continued)

Depreciation on property, plant and equipment is calculated using the straightline method to allocate their costs or revalued amounts to their residual values over their estimated useful lives, as follows:

Buildings
Machinery and equipment
Furniture and fixtures
Motor vehicles
15 to 40 years
6 to 15 years
3 to 10 years
5 to 7 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.8).

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within 'other losses – net' in the consolidated income statement.

When revalued assets are sold, the amounts included in revaluation reserve are transferred to retained earnings.

Construction-in-progress, representing buildings on which construction work has not been completed and machinery pending installation, is stated at cost, which includes construction expenditures incurred, cost of machinery, interest capitalised and other direct costs capitalised during the construction and installation period, less accumulated impairment losses, if any. No depreciation is provided in respect of construction-in-progress until the construction and installation work is completed and put into use. On completion, construction-in-progress is transferred to appropriate categories of property, plant and equipment.

2.7 Freehold Land and Land use rights Freehold Land is no depreciated.

The premiums paid to acquire land use rights are recorded as prepayment for operating lease, and are amortised using the straight-line method over the period of the land use rights of 45 to 50 years.

2.8 Impairment of investments in subsidiaries, associates and non-financial assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Impairment testing of the investments in subsidiaries or associates is required upon receiving dividends from these investments if the dividend exceeds the total comprehensive income of the subsidiary or associate in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

2.9 Derivative financial instruments

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designed as a hedging instrument, and if so, the nature of item being hedged. Derivative instruments held by the Group do not qualify for hedge accounting and are accounted for at fair value through profit or loss. Changes in fair value of these derivative instruments that do not qualify for hedge accounting are recognised immediately in the consolidated income statement within 'other losses – net'.

2.10 Government grants/subsidies

Grants/subsidies from government authorities are recognised at their fair value where there is a reasonable assurance that the grant/subsidies will be received and the Group will comply with all attached conditions.

Government grants/subsidies relating to assets are presented in the balance sheet by deducting the grant in arriving at the carrying amount of the asset.

Government grants/subsidies relating to compensation for relocation are deferred and recognised in the income statements over the period when the relocation takes place.

2.11 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). It excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the consolidated income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

2.17 Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

2.18 Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity, respectively.

(a) Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred income tax

Inside basis differences

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

(b) Deferred income tax (Continued) Outside basis differences

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

(c) Offsetting

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis

2.19 Employee benefits

(a) Employee leave entitlements

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date. Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

(b) Pension obligations (defined contribution plans)

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

(b) Pension obligations (defined contribution plans) (Continued)

The Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(c) Share-based compensation

The Group operates an equity-settled, share-based compensation plan. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted, excluding the impact of any non-market vesting conditions (for example, profitability and sales growth targets).

Non-market vesting conditions are included in assumptions about the number of options that are expected to become exercisable. At each balance sheet date, the entity revises its estimates of the number of options that are expected to become exercisable. It recognises the impact of the revision of original estimates, if any, in the income statement, with a corresponding adjustment to equity.

When the options are exercised, the company issues new shares. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

(d) Bonus plan

The Group recognises a provision for bonuses where contractually obliged or where there is a past practice that has created a constructive obligation.

2.20 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

2.21 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable, and represents amounts receivable for goods supplied, stated net of discounts returns and value added taxes. The Group recognises revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have been met for each of the Group's activities, as described below. The Group bases its estimates of return on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

(a) Sales of goods

Sales of goods are recognised when a Group entity has delivered products to the customer and the risk and reward of the goods has been transferred, the customer has accepted the products and collectibility of the related receivables is reasonably assured.

(b) Interest income

Interest income is recognised on a timeproportion basis using the effective interest method.

2.22 Operating leases (as the lessee)

3. FINANCIAL RISK MANAGEMENT

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: foreign exchange risk, cash flow and fair value interest rate risk, price risk, credit risk and liquidity risk. The Group's risk management focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge certain of its risk exposures on changes in interest rates.

(a) Foreign exchange risk

The Group mainly operates in Mainland China and Vietnam. Most of the Group's transactions, assets and liabilities are dominated in RMB or United States dollars ("USD"). Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. The Group is exposed to foreign exchange risk primarily through the bank borrowings that are denominated in a currency other than the functional currency of the Company and its subsidiaries. It manages its foreign exchange risks by performing regular review and monitoring its foreign exchange exposures.

At 31 December 2012, if RMB had weakened/strengthened by 3% against USD with all other variable held constant, post-tax profit for the year would have been RMB52,949,000 (2011: RMB38,583,000) lower/higher, mainly as a result of foreign exchange losses/gains on translation of USD-denominated pledged bank deposits, cash and cash equivalents, trade and bills receivables, trade and bills payables and borrowings.

(b) Cash flow and fair value interest rate risk

Except for pledged bank deposits and cash at bank (Note 14), the Group has no significant interest-bearing assets. The Group's income and operating cash flows are substantially independent of changes in market interest rates. Management does not anticipate significant impact resulted from changes in interest rates on interest bearing assets.

The Group's interest-rate risk arises from borrowings. Borrowings issued at variable rates expose the Group to cash flow interest-rate risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate risk. As at 31 December 2012, approximately 76% (2011: 79%) of the Group's borrowings were at fixed rates and the remaining were at floating rates.

The Group manages certain of its cash flow interest rate risk by using interest rate swaps. Such interest rate swaps have the economic effect of converting borrowings from floating rates to fixed rates or from fixed rates to floating rates. As at 31 December 2012, the Group converted borrowings of RMB451,970,000 (2011: RMB5,671,000) from floating rate to fixed rate and converted borrowings of RMB1,257,100,000 (2011: RMB1,260,180,000) from fixed rate to floating rate through interest rate swap (Note 19).

As at 31 December 2012, if interest rates on USD-denominated borrowings had been 0.3 percentage points lower/higher with all other variables held constant, post-tax profit for the year would have been RMB1,019,000 (2011: RMB446,000) higher/lower, mainly as a result of lower/higher interest expense on floating rate borrowings.

(c) Price risk

The Group is exposed to raw material price risk because of the volatility of the price of main raw material, cotton. The management of the Group analyze the trend of raw material price on weekly basis. To manage its price risk, the Group may decide to enter long term contracts to mitigate the impact from raw material price changes, and diversify the suppliers if they expect significant fluctuation in the future.

(d) Credit risk

The Group has more than 1,600 customers and does not rely on the orders from certain customers. So the Group has no significant concentration of credit risk. The carrying amounts of pledged bank deposits, cash and cash equivalents, trade and bills receivables and prepayments, deposits and other receivables represent the Group's maximum exposure to credit risk in relation to its financial assets.

The Group generally grants credit terms of less than 90 days to its customers in Mainland China and 120 days to its customers in other countries. The Group's management performs periodic credit evaluations/reviews of its customers and ensure that sales are made to customers with an appropriate credit history. The Group places deposits with major banks in Mainland China and Hong Kong, and limits the amount of credit exposure to any financial institution.

To lower the Group's exposure to credit risk, the Group may request 5% deposits from certain of their customers before delivery of goods. In addition, 100% (2011: 100%) of the bills receviables of the Group are endorsed by banks as at 31 December 2012.

3.2 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders or issue new shares.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

The gearing ratios are as follows:

本集團管理資金的目標為保障本 集團持續經營的能力,為股東帶來回報及為其他權益持有人帶來 利益,並維持理想資本結構以減 少資本成本。

The decrease in gearing ratio during 2012 was a result of the increase in total equity for 2012's profit and settlement of borrowing rendered from the cash generated from operations.

於二零一二年資產負債比率下跌 乃源於二零一二年溢利及營運所 得現金支付借貸以致股本總額增 加所致。

3.3 Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

As at 31 December 2012, the Group held interest rate swap contracts, and these derivative financial instruments are classified under level 2. The fair value of interest rate swap contracts are calculated as the present value of the estimated future cash flows based on observable yield curves.

The following table presents the Group's liabilities that are measured at fair value at 31 December 2012 and 2011:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31 December 2012 截至二零一二年十二月三十一日止年度 (All amounts in RMB) (所有金額以人民幣計值)

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

4.1 Estimated useful lives and residual values of property, plant and equipment

The Group's management determines the estimated useful lives and residual values and consequently the related depreciation charges for its property, plant and equipment. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment of similar nature and functions. It could change as a result of technical innovations and competitors action in response to sever industry cycles. Management will increase the depreciation charge where useful lives are less than previously estimated lives, or it will write-off or write down technically obsolete or non-strategic assets that have been abandoned or sold. Actual economic lives may differ from estimated useful lives, and actual residual values may differ from estimated residual values. Periodic reviews could result in a change in depreciable lives and residual values and therefore changes in depreciation expenses in the future periods.

4.2 Net realisable value of inventories

Net realisable value of inventories is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling expenses. These estimates are based on the current market condition and the historical experience of manufacturing and selling products of similar nature. It could change significantly as a result of technical innovations, changes in customer taste and competitor actions in response to severe industry cycle. Management reassesses these estimates at each balance sheet date.

4. 關鍵會計估計及判斷

各項估計及判斷均持續評估,並根據歷 史經驗及其他因素(包括於各種情況下 對未來事件被認為合理之預期)評估。

本集團作出有關未來情況的估計及假設,按照定義,會計估計結果一般將不會相等於有關實際結果。估計及假設對於就下一個財政年度內的資產及負債賬面值作出重大調整而構成的重大風險如下。

4.1 物業、廠房及設備之估計可使用 年期及剩餘價值

本集團之管理層釐定其物業、廠 房及設備之估計可使用年期及剩 餘價值以及相關折舊費用。該估 計乃根據類似性質及功能之物 業、廠房及設備之實際可使用年 期之過往經驗而釐定,並可能因 技術創新及競爭對手為回應嚴峻 行業週期採取之行動而有改變。 當可使用年期少於先前之估計年 期,管理層將增加折舊費用,或 將撇銷或撇減已報廢或出售之技 術廢舊或非策略性資產。實際經 濟年期可能與估計之可使用年期 不同,而實際剩餘價值可能與估 計之剩餘價值不同。定期檢討可 能使可折舊年期及剩餘價值出現 變動,因而引致未來期間之折舊 開支有變。

4.2 存貨之可變現淨值

存貨之可變現淨值乃經扣除完成 之估計成本及銷售開支後之日常 業務估計售價。該等估計乃基於 現行市況及製造與銷售性質質 產品之過往經驗而定,可能會 技術創新、客戶喜好改變及取 對手為回應嚴峻行業週期採層 行動而出現重大變動。管理層。 於各結算日重新評估該等估計。

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

4.3 Impairment of trade, bills and other receivables

The Group's management determines the provision for impairment of trade, bills and other receivables based on an assessment of the recoverability of the receivables. This assessment is based on the credit history of its customers and other debtors and current market conditions, and requires the use of judgements and estimates. Provisions are applied to trade, bills and other receivables where events or changes in circumstances indicate that the balances may not be collectible and require the use of estimates. Management reassesses the provision at each balance sheet date. Where the expectation is different from the original estimate, such difference will impact carrying value of trade, bills and other receivable and impairment charge in the period in which such estimate has been changed.

4.4 Income taxes and deferred income tax

The Group is subject to income taxes in several jurisdictions. Significant judgement is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Deferred tax assets relating to certain temporary differences and tax losses are recognised when management considers it is likely that future taxable profits will be available against which the temporary differences or tax losses can be utilised. When the expectations are different from the original estimates, such differences will impact the recognition of deferred tax assets and income tax charges in the period in which such estimates have been changed.

4.4 所得税及遞延所得税

凡管理層認為日後極可能有應課 税益利用作抵銷暫時差額及税項 虧損,則若干暫時差額及税項 損有關的遞延税項資產將予計 認。倘預期金額與原定估計計 同,則該差額將會影響該估計計 現變動期間的遞延税項資產及所 得税支出的確認。

Deferred income tax assets are recognised for tax loss carry-forwards to the extent that the realisation of the related tax benefit through the future taxable profits is probable. As at 31 December 2012, the Group did not recognise deferred income tax assets of RMB909,000 (2011: RMB888,000) in respect of losses amounting to RMB3,636,000 (2011: RMB3,555,000) that can be carried forward against future taxable income.

Deferred income tax of RMB 1,351,000 (2011: RMB1,316,000) was transferred from other reserves (Note 17) to retained earnings. This represents deferred tax on the difference between the actual depreciation on buildings and the equivalent depreciation based on the historical cost of buildings.

遞延所得稅資產乃就結轉之稅項虧損確認,惟以有可能透過日後之應課稅溢利變現有關稅項利益為限。於二零一二年十二月三十一日,本集團並無就將來可沖抵應納稅收入的人民幣3,636,000元(二零一一年:人民幣3,555,000元)虧損確認遞延所得稅資產人民幣909,000元(二零一一年:人民幣888,000元)。

人民幣1,351,000元(二零一一年:人民幣1,316,000元)的遞延所得税乃由其他儲備(附註17)轉撥至保留溢利。此代表樓宇的實際折舊與根據樓宇的歷史成本計算的相同折舊之間的差額的遞延税項。
